

VIEW Certified Products Guide

The table below lists the WLAN access points (APs) and controllers that have been VIEW (Voice Interoperability for Enterprise Wireless) Certified. Only WLAN products listed in the table have been tested for compatibility and acceptable performance with Spectralink® Wireless Telephones. Spectralink does not recommend or support deployments with WLAN infrastructure products not listed in the table. Supported products must be configured according to VIEW Configuration Guides for each product listed below. They must be deployed according to the relevant *Best Practices* and *White Papers* available at <http://www.spectralink.com/resources/white-papers> and <http://support.spectralink.com/pivot>

Each product listed in the tables below has a corresponding document. All Spectralink documents are available at <http://support.spectralink.com>. Use the dropdown menus to navigate to the VIEW Certified Products page and select the document you need from the list.

Spectralink 87-Series and 84-Series

All of the products listed provide Wi-Fi standard QoS and WPA2 PSK security.
