

## MEDIA RELEASE

[for immediate distribution 10 Nov 2000]

### New KIRK DECT Handset Increases Flexibility

The introduction of Kirk's new Z-3020 DECT cordless handset provides customers with greater flexibility to tailor a DECT cordless solution to match their exact needs. The new Z-3020 joins Kirk's 2 existing handsets, the top of the range Z-3040 and the Vibra II. It complements the Kirk range by offering a phone that boasts the same levels of quality performance, but at a significantly reduced cost.

It shares a number of common features with the highly successful Z-3040, on which it is based. These include:

- Excellent sound quality and superior range performance
- Compact size and weight (only 121g)
- Same battery performance of 10 hours talk / 90 hours standby
- Sharing of accessories such as chargers, cases, belt clips and batteries

The Z-3020 boasts a number of other key features, including:

- Single line LCD display
- Display of incoming caller's number for calls from another Kirk handset
- Adjustable handset volume, ring volume and programmable ring tones
- LED indication of incoming calls and unanswered calls
- R (recall) key for access to PABX services
- 10 number memory

Being GAP compatible, the Z-3020 can also be used on other cordless systems that conform to the DECT/GAP standard.

Savings of up to 30% compared with the other Kirk handsets have been achieved by removing some of the features found on the Z-3040 and Vibra II, which are not prerequisites for all applications, such as headset jack, vibration ringer and support for SMS text messaging.

Wavelink Communications (<http://www.wavelink.com.au/>) specialises in the supply, marketing and support of a range of leading edge digital wireless telephone systems and associated products that provide cost effective business solutions to Australian organisations. With offices established in Sydney, Melbourne and Perth, Wavelink are able to have a local presence covering the bulk of the Australian market.

Wavelink is the exclusive Australian distributor for a range of products from Kirk telecom A/S (Denmark <http://www.kirktelecom.dk/>) and Hagenuk GmbH (Germany <http://www.hagenuk.de/>).
