

## **KIRK 600v3 DECT wireless server receives BroadSoft Certification**

**SYDNEY, Australia, 2 April, 2008** – Wavelink Communications today announced that the Polycom KIRK 600v3 IP wireless DECT server has passed the BroadSoft SIP Access Devices Interoperability Test on BroadWorks R13.

The KIRK 600v3 is a fully scalable, wireless VoIP solution designed to meet the needs of small to medium sized business, including large multi-site enterprises, where an increasing number of employees are working away from their desks.

Jonathan Ordman, director, Wavelink Communications, said, "More and more organisations are relying on the freedom and flexibility that a wireless communication system can offer. The BroadSoft Certification of the KIRK 600v3 means that customers can benefit from an open platform that delivers a cost-effective solution for businesses where employee mobility and availability is paramount."

The KIRK 600v3 supports the following key telephony features on the BroadSoft platform:

- Caller Line Identification Presentation (CLIP) - name and number
- Call transfer / hold / retrieve / forward / waiting
- Music on hold
- Conference call (participate only)
- Message waiting indication (MWI)
- Time/date in the handset
- Text messaging.

Unique features of the KIRK 600v3 include the option of deployment as either a single -cell configuration with up to 35 wireless users, supporting up to 12 simultaneous calls, or a s a multi-cell configuration with up to 256 radio cells and 1,500 wireless users. Radio coverage across a site is achieved by using a combination of 600V3 units and wireless repeaters, which require no cabling.

The KIRK DECT 600v3 is capable of adding wireless extensions to VoIP telephony platforms. In addition to BroadSoft, the 600v3 has been certified as compatible with several other leading VoIP platforms, including Cisco CallManager and Digium Asterisk.

## MEDIA RELEASE

### **About Wavelink**
