

## **Wavelink and Commtech Wireless enter mutual Distribution Agreement**

**MELBOURNE, Australia, 6 May, 2008** – Wavelink Communications and CommtechWireless have reached agreement to mutually promote selected products from their portfolios to the other's distribution channels. Wavelink will be offering Comm techWireless's Fusion Series of hardware-based messaging systems to its wireless resellers, while Commtech Wireless will similarly promote Wavelink's Polycom family of KIRK DECT and SpectraLink Wi-Fi wireless solutions through their channels.

The Fusion Series is a hardware-based modular messaging system which is cost effective, scalable and simple to configure. A number of Fusion bundles have been developed specifically for both the KIRK and SpectraLink platforms. These offer a range of functionality including nursecall integration, alarm inputs, manual paging, SMS and e-mail notification.

Ilan Rubin, director, Wavelink Communications, said, "There is rapidly growing demand for on-site mobility solutions which are able to integrate with important event -monitoring systems such as nursecall. The market requires cost effective solutions which are simple to set up and maintain. CommtechWireless's Fusion Series meets these criteria perfectly".

Chris McLoughlin, CommtechWireless's CEO Asia Pacific, added "Being an Australian company means that we have developed interfaces for most of the event monitoring systems in Australia. As well as this, CommtechWireless has been a global development partner of KIRK and SpectraLink for several years, so Fusion is compatible with the entire family of wireless solutions."

### **About Wavelink**

Wavelink Communications ([www.wavelink.com.au](http://www.wavelink.com.au)) specialises in the supply, marketing and support of a range of leading edge digital wireless voice and messaging solutions. Wavelink distributes a range of products from Polycom including KIRK DECT and SpectraLink Wi-Fi.
