New Chipset Enhances DECT Handset Performance

29 January 2002

As part of KIRK Telecom's commitment to continuous product development, a number of hardware and software enhancements have dramatically improved the performance of their most popular DECT cordless handset. Effective immediately, the KIRK **Z-3040** handset is now equipped with a new chipset, which offers a number of significant benefits. These include:

- a. Talk time of the handset is increased from 10 hours to a massive 20 hours, allowing the phone to operate for up to 2-3 days* without requiring a recharge.
- b. The time required for the handset to "handover" a call between base stations has been effectively halved. This, combined with changes to the handover software algorithm, ensures that call dropouts as users move around their workplace are greatly diminished.
- c. An improved aerial also enhances handset performance.

* Actual talk time will vary depending on usage of handset on each site

Pricing of the new **Z-3040** remains unchanged, with standard features such as vibrating ringer, headset jack and support for display of text messages (on KIRK systems) making it one of the most popular DECT handsets on the market today. Being GAP compliant, the **Z-3040** operates not only on the KIRK **dect-z 500** and **dect-z 1500** adjunct cordless systems but also on other manufacturer's DECT GAP systems.

KIRK Telecom has been one of Denmark's leading manufacturers of telecommunications equipment for over 100 years. With a focus on the ongoing development of DECT cordless telephony solutions, KIRK is a leading supplier of adjunct and integrated OEM DECT solutions.

Wavelink Communications (www.wavelink.com.au) specialises in the supply, marketing and support of a range of leading edge digital wireless telephone systems and associated products that provide cost effective business solutions to Australian organisations. In operation since 1998, Wavelink has offices established in Sydney, Melbourne and Perth. Wavelink is the Australian distributor for a range of products from KIRK telecom A/S (Denmark www.kirktelecom.dk) and DeTeWe (Germany www.detewe.de).
