Unique 2-Way Wireless Messaging on Display at ASIAL 2004

10 June 2004

The Adept 2-way wireless text messaging system distributed in Australia and New Zealand by Wavelink Communications will be on display at the Security 2004 Exhibition. Organized by ASIAL (Australian Security Industry Association) the exhibition runs at Sydney's Darling Harbour Exhibition Centre from 14-16 July. Wavelink's products will be on display at stand 122 of the exhibition.

Manufactured by the UK's Blick Communications, Adept systems incorporate a number of unique features that sets them apart from other wireless messaging systems, including:

- **Two-way text messaging with confirmation**
All messages and alarms received by Adept portable units are automatically acknowledged, ensuring urgent messages are actually delivered. Text messages may also be sent from portable units to other portables or to the central operator, enabling a 2-way dialogue to be maintained. The system even constantly monitors portable units to ensure they are working properly.
- **Full duress capability with location reporting**
The duress portable units incorporate a number of duress features including alarm button, man down and rip cord, making the system ideal for use in high risk areas. Location identification of the user requiring assistance can also be incorporated into the system.
- **Ultra-fast messaging**
The Adept technology enables messages to be transmitted about 150 times faster than paging systems, making it ideal to multiple urgent messages to a large number of users. As well as this, unlike traditional paging systems which require site licences, the 1880-1900 MHz band that Adept operates in does not require any licencing, making it much simpler to deploy.
- **Family of portable devices**
The Adept system offers a number of different portable devices allowing systems to be tailored to suit the needs of specific sites.

These features make the Adept an ideal solution for a number of key target markets including security, healthcare, industrial and building evacuation.

Blick Communications specialises in the research, design and manufacture of wireless, time critical, voice and messaging applications. With over 30 years experience and exports to over 40 countries worldwide, Blick are one of Europe's leading suppliers of onsite radio paging, radio based staff protection and DECT.

Wavelink Communications (www.wavelink.com.au) specialises in the supply, marketing and support of a range of leading edge digital wireless voice and messaging solutions. Wavelink is the exclusive Australian distributor for a range of products from Blick Communications (UK), Kirk telecom A/S (Denmark) and DeTeWe AG (Germany).
