

**Wavelink Signs Distribution Agreement with Spok**

**May 18, 2017** – Wavelink has signed a distribution agreement with Spok, Inc., for Australia and New Zealand.

Spok® is a provider of critical communications solutions for healthcare, hospitality, and enterprise. Together, Wavelink and Spok will help hospitals evaluate and transform how care teams communicate as they work to improve patient outcomes with Spok Care Connect®. This enterprise healthcare communications platform is extremely flexible, spanning voice, messaging, alarms, and alerts across many different devices. The directory, scheduling, and preference data at the heart of the system enable the right people to be reached around the clock, improving both staff and patient satisfaction.

Wavelink is the first Spok distributor in the region, and the partnership includes Spok's alerting software, hardware, maintenance, and services. The agreement also includes distribution to Spok's existing resellers and will be offered to Wavelink's approximate 300 resellers in the region.

"Spok Care Connect complements the work we are doing within the Wavelink Health Practice. Our focus is to identify and deliver the clinical applications healthcare professionals need to improve patient care and provider responsiveness," said Ilan Rubin, managing director of Wavelink. "This partnership is another step forward for Wavelink in developing a range of messaging and application solutions offerings for partners and customers."

"Doctors and nurses are under increasing pressure to become more efficient while improving patient care and satisfaction," said Hemant Goel, president of Spok. "We are pleased to partner with Wavelink to help equip Australia and New Zealand hospitals with more effective clinical communication solutions."

Spok Care Connect integrates with existing hospital workflows to deliver information quickly and securely into the hands of the clinicians who need to act on it, wherever they are and on whatever device they are using. From the contact centre to the patient's bedside, Spok Care Connect provides directory details, on-call rosters, staff preferences, secure texting, and more.
