

## MEDIA ALERT

April 30, 2010

### Polycom introduces new KIRK 7010 DECT Handset for healthcare sector

Polycom has introduced the new KIRK 7010 handset – the first in a series of DECT handsets specifically designed to meet the needs of the healthcare sector.

The KIRK 7010 handset provides a 'ruggedised' and application-enabled solution for healthcare environments.

The handset enables clinical and administrative users to benefit from wireless telephony within hospitals, aged care and clinics by providing features specifically required in these environments, including:

- handset protection against splashing water (IP54) when assisting patients in wet areas
- disinfectant resistant handset to avoid the spread of bacteria when caring from one patient to another
- support of alarm icons for third-party nurse call integration, patient and equipment monitoring

Polycom KIRK DECT systems and handsets are distributed exclusively by Wavelink Communications in Australia.
