

# Cisco Systems and Spectralink Wireless Communication Solutions

As a Solution Partner in the Cisco Developer Network (CDN) Spectralink offers several Cisco-certified solutions to help our joint customers solve every day.

Customers can choose from two types of industry-leading, Cisco-certified enterprise wireless communication solutions that improve employee mobility, responsiveness, and productivity.

The Spectralink 7000 Portfolio is a cost-effective, flexible, and user-friendly DECT solution certified interoperable with Cisco Unified Communications Manager (CUCM) and Cisco Business Edition. The Spectralink 7000 Portfolio is a highly secure and reliable wireless telephony solution. Its modular nature allows customers to easily expand coverage, voice traffic, and number of users, making it ideal for businesses of all sizes.

The Spectralink 8000 Portfolio handsets are the market-leading, enterprise-grade Voice over Wireless LAN (VoWLAN) telephones supporting SIP interfaces, including Cisco SIP. They are certified by Cisco as interoperable with Cisco CCX, WLAN access points and/or Controllers.

Cisco WLAN infrastructure products have also achieved Spectralink VIEW (Voice Interoperability for Enterprise Wireless) certification for added assurance and support.

## BENEFITS

### Mobility

Add mobility to improve productivity, communication and satisfaction for mobile workers.

### Customization and Choice

Choose from industry-customized wireless solutions to meet the individual need of each employee.

### Proven Interoperability

Certified interoperable by both Cisco and by Spectralink; coordinated trouble resolution.

### Feature-Rich

Add Cisco-specific features to already rich set of Spectralink features.

### Solutions

Spectralink wireless devices are customized for verticals such as healthcare, manufacturing, retail, and many other specialized working environments.
